# MOHAMMAD FAIZAN

*Senior UX & Product Designer* · ***Leveraging AI in UX***

**Phone:** +92 331 973 9913 | **Email:** mohm.faizan@gmail.com | **LinkedIn:** linkedin.com/in/faizanmaharvi

## PROFESSIONAL SUMMARY

Senior UX & Product Designer specializing in end-to-end UX and UI design — from wireframing and prototyping to interaction design and delivery — for enterprise SaaS, RV and boat dealership management systems, and digital products across tech, e-commerce, finance, and healthcare. Early adopter of AI-powered design, leveraging Claude Design and Claude Code to accelerate ideation, prototyping, and delivery.

## TALENTS & SKILLS

**Product Design**

- End-to-End Product Design (Discovery → Delivery)
- Interaction Design & Usability Testing
- Systems Thinking & Design Systems
- Complex Workflow & Operational UX
- UX Strategy & Design Thinking
- Wireframing, Prototyping & User Flows
- UX Research & Journey Mapping
- Responsive & Mobile-First Design
- Accessibility & Inclusive Design (WCAG)
- Information Architecture

**Design Leadership**

- Product Thinking & Decision-Making
- Agile / Scrum Product Development
- Stakeholder Management & Cross-Functional Collaboration
- Facilitation of Design Reviews & Workshops

## TOOLS

**Design:** Figma · Adobe XD · Sketch · Adobe Creative Suite · InVision · Claude Design

**AI:** Claude Code · Claude Design

**Project Management:** Jira

## PROFESSIONAL EXPERIENCE

**Contour Software · IDS Astra** — **Senior UX Designer**

*Oct 2020 – Oct 2026*

*IDS Astra is a leading provider of Dealer Management Systems (DMS) for the RV and marine industry, operating as a division of Constellation Software Inc.*

- Led end-to-end UX for IDS360 — a B2B SaaS DMS covering service CRM, sales CRM, parts requests, work order management, and invoicing — collaborating with Product Managers, Engineering leads, Business Analysts, and QA teams.
- Designed the IDS Service Mobile App for service advisors and technicians, delivering responsive, mobile-first experiences across RV and boat dealerships — from user research and journey mapping through Figma prototyping to production handoff.
- Conducted user research, usability testing, and stakeholder workshops to validate design decisions and reduce friction in complex dealership operational workflows.

- Partnered with the VP of Innovation on UX strategy for new business initiatives, contributing to early-stage product thinking and presenting concepts to executive stakeholders.
- Built and maintained the shared design system in close coordination with Engineering and QA teams, ensuring design consistency and development efficiency across multiple product surfaces.
- Integrated AI-powered tools (Claude Design, Claude Code) into design workflows to accelerate prototyping, ideation, and delivery.

**WorkFello** — **UX Designer Lead**

*Mar 2019 – Sep 2020*

*Designed and shipped two B2C platforms — a TikTok-style video commerce app and a job board — alongside client projects across multiple industries, owning UX from discovery through production.*

- Led end-to-end UX for a B2C video shopping platform — seller onboarding, product listing, buyer discovery, and checkout flows for individual sellers and SMBs — in collaboration with Product Managers and Engineers.
- Designed a dual-sided B2C job board platform: candidate-facing job discovery and application flows, employer dashboard for recruiter workflows, and internal admin tools — working closely with the development team and business stakeholders from discovery to launch.
- Served as sole UX lead across client projects spanning multiple industries — delivering mobile-first, responsive, production-ready UI in direct collaboration with developers and Product Managers.
- Improved conversion rates by 18% through A/B testing, iterative usability testing, content hierarchy restructuring, and CTA optimization.

**Click Chain Inc.** — **UI/UX Designer**

*Feb 2017 – Aug 2018*

*Sole UX designer embedded across multiple concurrent product teams — spanning telecom billing, US legal SaaS, and laboratory information management (LIMS) — delivering end-to-end design across enterprise domains.*

- Sole UX owner for ABG Communication (B2B telecom billing platform) and LevelCloud (B2B US legal case management SaaS) — embedded with separate engineering teams and working with Product Managers and business stakeholders to translate complex operational workflows into clean, navigable interfaces.
- Designed UX for a Laboratory Information Management System (LIMS), creating data-dense B2B interfaces for scientific workflow tracking, sample management, and analysis reporting.
- Worked as Scrum Master across three to four concurrent engineering teams — managing sprints, backlogs, and cross-team stakeholder alignment to improve on-time delivery and design-development handoff.

## E D U C A T I O N

**The Islamia University of Bahawalpur** — Master's in Computer Science

*2012 – 2014*
